## Playing Card Co

What is the Euchre app?

The object of the app is to help new players of the game learn the rules, know the hierarchy of the playing cards, and to use the app to help them know which cards are the best by giving them the ability to choose the trump suit and input their hand, and the app will tell them which of their cards is the best to play.

What is Euchre?

Euchre is a card game predominately played in the Great Lakes region of the U.S. It only uses 24 playing cards, using the 9, 10, J, Q, K and A of each suit. The Jacks are the most powerful cards, called Bowers. The game requires four players to play.

Why use the Euchre app?

In addition to learning the rules and the game, it also has fun tips and links for users.

How Euchre works:

The app does not require a login...anyone can use it. There is an option to link the app to your Facebook account. Once you download the app, the main screen gives the options of Rules, Cards, My Hand, and Tips.

If you click on Rules, you will get the main written rules of the game.

If you click Cards, you will get a visual slideshow and description of each card (ex. Jack of Clubs... If Clubs is Trump, then this is the most powerful card in the deck, also called the Right Bower. If Spades is Trump, then this is the second most powerful card in the deck, also called the Left Bower. If any other suit is Trump, then it is an off-suit card and follows in rank behind the Queen of Clubs... A of clubs, K of clubs, Q of clubs, J of clubs, etc.).

If you click My Hand, you can use this interactive tool to help you decide which of your cards is the strongest. You will be prompted to select the suit that was called Trump, and then select the cards in your hand. The cards will then sort from strongest to weakest, and then you can use that to decide what you will play.

Tips will just be short, helpful ideas that might help you in the game. Example, one tip might be that if Clubs is Trump, and Clubs is lead, if you don't have any Clubs in your hand, then play the lowest card in your hand, and save your highest cards as possible off-suit stoppers as the cards are played.

Other Possibilities:

People who link their Facebook account to the App are eligible to join the Facebook Page where they could leave feedback about the app and physical game, and access to items sold only to app users.
